

# NUTS AND BOLTS

Ledwell News

## ROLL OFF HOIST

Roll Off Hoists are used widely in the waste industry, but can be suited to any company hauling up to 24 foot containers. Our 66,000 pound capacity Roll Off system incorporates four interchangeable cylinders, easy to service rollers and bolt on aluminum fenders. Each Roll Off Hoist includes a full function wireless remote control system, as well as, in cab controls to work in any situation. We offer a heavy duty pintle hitch option, air lift steerable pusher and retractable bumper. Customizations are endless as with any Ledwell piece of equipment.

The unit shown above is on a Freightliner 114SD. We have trucks in stock and are ready to mount a Roll Off Hoist quickly. Ledwell has spent decades building quality equipment to suit our customers, and this latest product is no different. It's not just well made, it's Ledwell made.

Logistically Speaking

During the 2017 season of the Texas State Fair, Ledwell had the honor to feature two custom built units in Ford's designated area including our Ledwell 5-6 yard box dump featured on a F650 and Ledwell's newest addition to our product line, the Attenuator Truck. The show-cased Ledwell Crash Truck incorporated a 16 foot bed with removable stake sides and Trinity attenuator.

### A letter from the Founder of First Response Team of America:

2017 will be remembered as a historic year when it comes to natural disasters. A record breaking year of storms affected millions of families and left many trying to figure out how to pick up the pieces. For this reason, the First Response Team of America keeps responding to storms year after year to help our fellow man in what often is their greatest hour of need.

Though we responded to many tornadoes, floods and hurricanes in different parts of the U.S. this year, Texas needed our help the most after Hurricane Harvey devastated many parts of the state, spanning hundreds of miles.

When faced with tragedy, the people of Texas are resilient and they give of themselves to others in need, regardless of what they are facing themselves. A family owned company that embodies that giving is Ledwell and Son. Because of their financial support and donated trailers, we have helped 13,313 people and saved communities \$3,224,350 in this year alone.

Whether it is clearing roads for emergency officials to access those in need, powering up a shelter or clearing out homes that have been flooded, we can be there and make a difference because of Ledwell's support.

I would like to personally thank all of Ledwell's customers and employees who make this very unique partnership possible. Together we are making a real and positive impact in the lives of our fellow Americans in need.

Sincerely,

Tad, Founder of the First Response Team of America

# RETIREMENT

LARRY  
BLAKE

Larry Blake is traveling the highways for a different reason, to see family. One of Ledwell's finest drivers retired in September of last year after 19 years of service. He delivered all types of equipment all over the country, but his favorite piece to deliver were bulk haul feed trailers. Larry enjoyed delivering to customers and walking them through how their new equipment operated. "The best part is when their eyes light up," describing what he liked best about each delivery. Larry and his wife Rhonda have been married for 46 years. They have four children and 15 grandchildren together. He is enjoying life and is loving every bit of being retired.

"There is so much that I could say about Larry Blake, but what stands out most is how much he cares. He would bend over backwards for anyone if they asked him for help, no matter what it was. It was a blessing and honor to work with him."  
Seth Bridges

# EMPLOYEE SPOTLIGHT

## THOMAS BUTCHER

In October of 1993, Thomas Butcher started working at Ledwell in William Griffin's shop. After a few years, he moved to the Machine Shop running the Saw Department for two years. Thomas has spent most of his time at Ledwell in the Break and Shear Shop. In 2017, Thomas was promoted to shop foreman and oversees six people on day to day projects.

Thomas enjoys building different parts for different units, but says the people he works with and the Ledwell family is the best part of his job. "Building breast cancer ribbons that can be seen around Texarkana," he said when asked about his favorite project over the years.

Thomas and his wife will celebrate their 18th wedding anniversary this year. They have three children, two boys and a girl. He enjoys hunting, fishing, camping, really anything outdoors. Thomas tries to spend as much time as he can chasing his kids in their activities and traveling.

# LOGISTICALLY SPEAKING

Last fall, Ledwell held a Hydraulic Class for one of our customers in Mexico. They had employees from several locations come to Monterey to learn more about their Ledwell trailers and hydraulic systems. A large cross-section of people attended including; corporate, mechanics, engineering and drivers. Arturo Lasanta, International Sales, Andy Squillante, Engineering, and Ignacio "Nacho" Garcia-Sanchez, Hydraulic Specialist from Ledwell taught the class.

Training on hydraulics began with the basics from theory to pumps and motors. They continued with the complete deconstruction of the Ledwell Severe Duty Cooler and gear boxes. On the final day, everyone gathered at the local mill to demonstrate a Ledwell Bulk Haul Feed Trailer. Lube points, seals and function were discussed to train the customers how to maintain and know what to look for when inspecting the trailer.

If you are interested in hosting a class for your employees, please give us a call 888-533-9355.
